NOTTINGHAMSHIRE AND NOTTINGHAM WASTE LOCAL PLAN

INDEPENDENT EXAMINATION

HEARING SESSIONS - PROGRAMME

Between Tuesday 15th and Thursday 17th October 2024

Venue: The Rufford Suite, Nottinghamshire County Hall, Loughborough Road, West Bridgford NG2 7QP

Sitting times: Tuesday 10.00 to 12.30 and 13.30 to 17.00

Wednesday 09.30 to 12.30 and 13.30 to 17.00

Thursday (contingency session, if required) 09.30 to 13.30

The number in square brackets after each question is the number allocated to the questions in the Inspector's Matters, Issues and Questions Document.

The timetable and list of participants may be subject to change. Hearing participants are respondents who have requested an oral hearing.

DATE	TOPIC	PARTICIPANTS
TUESDAY 15 OCTOBER AM	Introduction by the Inspector Opening Statement by Council	
	A LEGAL COMPLIANCE	
Commence at 10.00am with a lunch break at	Main Matter 1 – Legal Compliance and the Duty to Co-operate	Local Planning Authorities
approximately	AGENDA	
12.30pm		
	Duty to Co-operate	
	Have the Councils engaged constructively, actively and on an ongoing basis with all relevant organisations on strategic matters of relevance to the Plan's preparation, as required by the Duty to Co-operate (under s20(5)(c) and 33A of the 2004 Act?) [1]	
	On which issues has co-operation taken place? [2]	
	How was co-operation carried out and with what results? Has this been documented? Are there any outstanding issues? [3]	
	How has the Duty to Co-operate been met with regard to the spatial plans of the constituent District Councils, Borough Councils, Parish Councils, neighbouring Councils and prescribed bodies on strategic and cross boundary matters? [4]	

Are there any strategic matters relevant to the Plan which would require cooperation with minerals and waste planning authorities in locations further afield than those adjacent to the Nottinghamshire County boundaries? If so, what engagement has taken place with the relevant authorities? [5]

Planning and Compulsory Purchase Act 2004, Section 19 and the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended)

Has the Plan been prepared in accordance with the Councils' Local Development Schemes including content and timescale? [6]

Has the Plan been prepared in compliance with the adopted Statements of Community Involvements (SCIs), allowing for effective engagement of all interested parties and meeting the minimum consultation requirements set out in the regulations?

Have the publication, advertisement and availability of the Plan followed the procedures set out in the 2004 Act and 2012 Regulations? [8]

Whether the Sustainability Appraisal (SA) complies with the requirements of the 2004 Act, the Strategic Environmental Assessment Directive (SEA Directive) and the Environmental Assessment of Plans and Programmes Regulations 2004 (the SEA Regulations)

Has the SA process complied with the requirements of the SEA Directive and the SEA Regulations? [9]

Is there clear evidence to indicate why, having considered reasonable alternatives in the SA, the strategy in the Plan is an appropriate response? Does the methodology conform to that in the NPPF and Planning Practice Guidance (PPG)? [10]

Has the SA process been genuinely iterative and carried out in step with the stages of plan preparation?

[11]

Are the alternatives considered by the SA sufficiently distinct to highlight the different sustainability implications of each? [12]

Is there clear evidence to indicate why, having considered reasonable alternatives, the Plan's strategy is an appropriate one? [13]

Is the Plan consistent with national policy, including the NPPF, National Planning Policy for Waste (NPPW) and PPG? Are there any significant departures from national policy? If so, have they been justified? [14]

Does the Plan comply with the 2004 Act and the 2012 Regulations in terms of publishing and making available the prescribed documents? [15]

Conservation of Habitats and Species Regulations 2017

Does Chapter 13 of the Plan meet the requirements of the Conservation of Habitats and Species Regulations 2017, including any relevant case law [in particular the ruling of 12 April 2018 by the Court of Justice of the European Union (CJEU) *People over Wind, Peter Sweetman v Coillte Teoranta*, Case 323/17] to consider the likely significant effects of projects or plans on European protected sites, individually or incombination? In particular, have Appropriate Assessments been undertaken under the Habitats Directive? If not, has a screening exercise shown that there is no need for such assessments? [16]

How has the Plan taken account of its findings? [17]

Does the Plan contain policies designed to secure that the development and use of land in the Plan area contributes to the mitigation of, and adaptation to, climate change?

To what extent does the development plan contain policies designed to secure that the development and use of land in the Plan area contributes to the mitigation of, and adaptation to, climate change? [18]

Does the Plan raise any issues which are of relevance to the Public Sector Equality Duty?

Has the Plan been informed by a robust assessment of its potential equality impacts? [19]

How have issues of equality been addressed in the Plan? In particular, how will the Plan help to advance equality of opportunity between people who share a "protected characteristic" as defined in the Equality Act 2010 and those that do not share it and further the other two aims of the Act? [20]

DATE	TOPIC	PARTICIPANTS
TUESDAY 15 OCTOBER	B SOUNDNESS	
AM/PM	Main Matter 2 – Scope and Context of the Plan and Waste Management in the Plan Area	Local Planning Authorities
	AGENDA	
	Issue: Whether the identification of future waste needs is sufficiently evidenced based and robust	
	Does the Waste Needs Assessment (May 2023) (WNA) provide an appropriate and robust mechanism to support the identification of the future waste management needs in the Plan area and does it adequately take into account future growth forecasts and Government targets to reduce residual waste and increase recycling rates? [1]	
	Does the WNA adequately take into account levels of waste management capacity in neighbouring authorities? [2]	
	Does the WNA and the Plan adequately consider the relationship between increased energy recovery capacity and landfill capacity? [3]	
	Are the chosen scenarios for forecast waste arisings sufficiently evidenced based to be considered as the preferred options upon which to base the Plan? [4]	
	Does the approach taken in the Plan to not identify any specific allocations for new waste management facilities inhibit the attainment of the preferred high recycling scenarios for LACW, C&I and CD&E Waste? [5]	
	How does the Plan influence the attainment of the preferred high recycling scenarios to ensure that the capacity gaps identified in Tables 11 and 12 are robust? [6]	
	Does the Plan make adequate provision for future non-hazardous landfill to manage LACW and C&I in circumstances where paragraph 5.49 of the Plan identifies that opportunities for new provision during the Plan period may be limited? [7]	
	Does the approach taken in the Plan to not identify any specific allocations for new waste management facilities inhibit the movement of waste management up the waste hierarchy and adequately support the circular economy? In this respect would the Plan be consistent with the NPPW in terms of looking for	

	opportunities to co-locate waste management, and in terms of care being taken to avoid stifling innovation? [8]	
	Does the Plan adequately take into account the implications of the declarations of climate change emergencies and consequent reductions in CO2 emissions targets and the impacts this might have on sites with contracts for the management of household, industrial and commercial waste with those bodies? [9]	
	Should the Plan be more explicit regarding the approach to net self-sufficiency with particular regard to energy recovery? [10]	
	Should the Plan be more explicit with regard to the colocation of waste management facilities? [11]	
	Do the Scope and Context of the Plan consider the relationship with the Nottinghamshire Minerals Local Plan (2021) in relation to the production and use of secondary and recycled aggregates? [12]	
DATE	TOPIC	PARTICIPANTS
TUESDAY 15 OCTOBER PM	Main Matter 3 – Vision and Strategic Objectives of the Plan	Local Planning Authorities
	AGENDA	
	Issue: Whether the Vision and Strategic Objectives of the Plan are the most appropriate, are soundly based and provide an appropriate basis for meeting the future waste management needs sustainably.	
	Is delivery of the Vision realistic and does it adequately and accurately reflect the future environmental, economic and social dimensions of the County and City to ensure the sustainable management of waste? [1]	
	Do the Vision and Objectives (and the Plan more generally) demonstrate that adequate consideration has been given to any cross-boundary issues, and any strategic growth priorities? [2]	
	Should the Vision reflect an aspiration for net self- sufficiency and, if so, should the Plan explain how this could be achieved? [3]	
	How does the Plan contribute to the improvement in the quality of life of those living, visiting and working in the Plan area and, in particular, how do the Strategic Objectives contribute to the delivery of this aspect of the Vision? [4]	

Local Plans which identify sufficient opportunities to meet identified needs for their area for the management of waste streams"? [5]

Do the Vision and Objectives (and the Plan more generally) adequately promote the proximity principle, circular economy principles, and the waste hierarchy?

[6]

Are the Plan's objectives consistent with the NPPW insofar as it states that waste planning authorities should look for opportunities to co-locate waste management facilities together and with complementary activities? [7]

Do the Vision and Strategic Objectives adequately protect the historic environment? [8]

In the absence of any specific allocations for new waste management facilities, how does the Plan deliver Strategic Objective 1 with particular regard to ensuring that there is a mix of site types, sizes and locations to help manage waste sustainably? [9]

10. In circumstances where alternatives to road transport are not possible or feasible, how does the plan achieve compliance with Strategic Objective 6? [10]

DATE	TOPIC	PARTICIPANTS
WEDNESDAY 16 OCTOBER AM	Main Matter 4 - Strategic Policies AGENDA	Local Planning Authorities Heatons for Tarmac
Commence at 09.30 am with a lunch	Issue: Do the Strategic Policies reflect the Vision of the Plan and deliver the Strategic Objectives; and are they justified and consistent with national policy?	Ltd
break at	Policy SP1	
approximately 12.30pm	Are the justification paragraphs 7.9 and 7.10 sufficiently implicit in the policy or elsewhere in the Plan? [1]	
	Policy SP2	
	In the absence of any specific site allocations for waste management development, how does the Plan provide sufficient waste management capacity to meet identified needs over the Plan period? [2]	
	Is the policy sufficiently supportive of the waste hierarchy and is it sufficiently capable of ensuring that future waste management provision ensures that waste is managed higher up in the waste hierarchy? [3]	
	Policy SP4	
	Is the policy appropriately worded and sufficiently flexible to ensure that it is supportive and not prejudicial to the use of inert waste to achieve the restoration of mineral sites? [4]	
	Does paragraph 7.38, which suggests that non-hazardous and hazardous waste may not necessarily be managed within the Plan, conflict with the provisions of Policy SP2? [5]	
	Policy SP5	
	Should the policy and/or the justification text make reference to the effect of manging waste higher up the waste hierarchy on climate change? [6]	
	Should the justification text explain the relationship between the planning regime and the pollution control/permitting regime in relation to climate change? [7]	
	Policy SP6	
	Is the Plan sufficiently clear as to how the use of alternative modes of transport in waste management development should be first considered and demonstrated and should this be more explicit in a Development Management Policy? [8]	

In circumstances where the use of alternative modes of transport to the use of the highway network is not available, practical or viable, should the policy refer to the need for the use of low or zero emission vehicles?

[9]

Should the Policy cross-reference the requirements of Policy DM12? [10]

Does clause 2 of the policy achieve the appropriate balance of supporting the Vision and Strategic Objectives of the Plan whilst recognising that some waste may need to be managed from areas outside the Plan area and should any reference be made to the concept of net self-sufficiency? [11]

Policy SP8

Is the appropriate balance struck between the needs of competing development with the need to protect waste management facilities? [12]

Does the Plan provide sufficient guidance to applicants for non-waste management development and District/Borough Council's as to how Policy SP8 should be implemented? [13]

Should the Plan identify any forms of development that would be acceptable within proximity of an existing waste management facility and which would not require any consultation with the Waste Planning Authority? [14]

DATE	TOPIC	PARTICIPANTS
WEDNESDAY 16 OCTOBER AM	Main Matter 5 – Development Management Policies	Local Planning Authorities
2	AGENDA	
	Issue: Whether the development management policies strike an appropriate balance between seeking to provide sustainable development and protecting people and the environment and are they justified, effective and consistent with national policy.	
	Policy DM1	
	Is all employment land suitable for waste management development? If not, should the policy explain that some employment sites may be unsuitable or require mitigation measures, such as activities to be undertaken within the confines of a building? [1]	

Policy DM2

Should the justification text be more explicit regarding the role of the environmental permitting regime and its relationship with the planning regime with particular regard to emission controls? [2]

Policy DM3

Does the policy adequately consider the impact of waste management development on the historic environment? [3]

Should the policy/justification explain that the design of waste management facilities should also reflect the 'Agent of Change' principle by requiring that the waste management facilities are designed to ensure that the operation/use of nearby land uses is not prejudiced?

Policy DM4

Is it sufficiently implicit in the policy and/or Policy DM3 that waste management development should be designed and/or provided with appropriate landscape treatment to mitigate the visual impact of such facilities? [5]

Policy DM6

Is the policy consistent with national planning policy with regard to the protection of the historic environment? [6]

Policy DM11

Is the policy sufficiently clear regarding the planning considerations that a developer may need to take into account in respect of development proposed within an Airfield Safeguarding Area? [7]

Are the Airfield Safeguarding Areas shown on Plan 2 indicative in their size or geographically correct in the area shown on the plan? In any event, are the Airfield Safeguarding Areas shown in more detail on the Policies Map and, if so, should the justification text identify where more geographical detail can be found? [8]

Policy DM12

Is the policy/justification sufficient clear to explain how consideration of alternative transport modes should be demonstrated? [9]

Should the policy be more explicit regarding the need for Transport Assessments to accompany waste management development? [10]

	Should the policy refer to the need for development proposals to demonstrate the use of low or zero emission vehicles? [11]	
	Should the policy be more pro-active in terms of its approach to alternative and sustainable transport provision for visitors and staff in waste management development proposals? [12]	
DATE	TOPIC	PARTICIPANTS
WEDNESDAY 16 OCTOBER	Main Matter 6 – Implementation and Monitoring	Local Planning Authorities
PM	Issue: Whether the implementation and monitoring of the Plan will be effective.	
	Is the approach to monitoring and Implementation in the Plan robust and practicable? [1]	
	Is it clear how the monitoring arrangements demonstrate that the Plan takes a pro-active approach to mitigating and adapting to climate change? [2]	
	Does the monitoring process provide for co-operation and participation and are appropriate participants involved? Where monitoring indicates that review/update of the Plan's policies might be necessary how would the monitoring and implementation framework ensure that Boroughs engage with DtC bodies on a constructive, an active and an ongoing basis on any relevant strategic matters? [3]	
	Should the corrective action for SP2 and SP4 include a review of the Plan to consider the allocation of specific sites or areas of search for new waste management facilities? [4]	
	CLOSE	
	Next Steps - Discussion with the Council regarding the next stages in the administrative and procedural matters following the close of the Hearing Sessions.	
DATE	TOPIC	PARTICIPANTS
THURSDAY 17 OCTOBER 09.30AM	Contingency session only in the event of any overrun
